1	Sprint Trainer	4	\$36	\$25

Condition Rating System Guide

5 = New – These are items purchased within the last 6-9 months, unless they have had a lot of wear in that period of time, in which case they are listed in “Excellent” condition instead.

4 = Excellent – The item looks like new at first glance, but shows some minor wear.

3 = Very Good – At a glance the item looks like a nice piece of equipment, but upon a closer look, the item shows noticeable wear. The item will still have many years of life left.

2 = Good – The item shows noticeable signs of wear but has lots of life left. This is still an item you would not mind putting out front by your parent viewing area. For example, mats may be getting soft in the center, but are not bottoming out yet or mat may have a split seam, but otherwise good.

1 = Fair – The item shows lots of wear but still has some life left. This is not an item that you would put out front by your parent viewing area. For example, this is a mat that you would probably hide under another mat, or is a mat that has bottomed out.

0 = Poor – This item has minimum wear left. For example, item may be good to have for spare parts or as a backup in the event of an emergency.
